

The World Drum Project

Our aim is to bring attention to the critical situation for Mother Earth –
The web of life is coming undone and will bring catastrophic
consequences.

From Whitecougar's vision and participation between several people,
The World Drum has been created (by Birger Mikkelsen),
and sent on a journey to participate in worldwide ceremonies.

Our Goals

We aim to wake people from their lethargy and indifference.
We demand ACTION from our Governments and politicians instead nice,
but empty, phrases.

We have to make drastic actions to reduce and
stop pollution and poisoning.

We need a bountiful harvesting of resources, today we destroy our own home -
Mother Earth - and ruthlessly exploit all her natural resources.

Scientific facts, signs and tendencies in nature are all pointing to an
accelerating catastrophe.

A challenge

We would like to call for all environmental organisations, groups and
people who want a better world,
to cooperate and unite their force.

Participation in ceremonies

The thought behind the project is that the participant brings attention to
the critical situation for Mother Earth.

To make it work we must try to reach the press, hand out flyers, have the
ceremony in public places.

We are striving to keep the drum in motion – riding on a wave of force.
This includes a strategic and further view than just until the next
ceremony.

We will weave a thread throughout the world, which will bind us together
in dynamic cooperation for a better world.
