

*Stop the madness - We can't go on allowing the norms of capitalism to blindly over-rule all social and environmental concerns. This practice is dangerous, and will bring humanity and mother earth into a deep crisis. In utter blindness and greed we have become enemies of life.*

*Praha 25.09-2000*

## **Stop the war against nature and between humans. The situation for Mother Earth is critical NOW!!!**

The web of life is coming undone- and brings catastrophic consequences. We are showing an endless lethargy and indifference that is threatening our own existence and life as we know it.

We need to free our selves from the boundaries of religion, false politicians bought by large enterprises with money and power and stop the population explosion.

The democracy are supposed to reflect the will of the people.

We must cooperate for a LIVING EARTH in balance,  
not compete and kill each other.

It is within our power to create a reality with harmony,  
cooperation between humans, and between humankind and nature.

But we can't any longer close our eyes to what's happening,  
we can not any longer relate to reality in the perspective of our ego.

We must seek a deeper truth and think holistic.

We need to start NOW

Its URGENT
